DETAILED ACTION

Allowable Subject Matter

1. Claim 1, 3, 4, 9 and 10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a digital switching system with a switching control means comprising control memories. The prior arts in the record fail to teach or make obvious to a system comprising read-out controlling means for storing the connection information corresponding to before and after switching, received through the information receiving means, to addresses designated by the connection information in one of a first memory means and a second memory means, and for sequentially reading out the stored connection information in read-out order of the switching means wherein the first memory means and the second memory means are each independently capable of simultaneously writing and reading or working memory means for storing the connection information from the information receiving means, the working memory means reading out as a read-out signal the stored connection information in response to the switching signal from the network switching control means and read-out selection means for selecting the connection information from one of the working memory means and the information receiving means and outputting the selected connection information in

response to the switching signal from the network switching control means within the structure of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
